Ores & Minerals

Water Testing Lab

The water testing lab at Ecomen is an ultra-modern advanced testing facility equipped with some of the most advanced analytical, testing & research instruments including ICP-MS & AES (Agilent - USA), LC-MSMS, GC-MSMS, QToF (Waters - USA) capable of detecting impurities like heavy metals & pesticide residues at ultra trace levels (ppb/ppt).

Basic Panel - Rs. 1500/-
Covers Physical & Chemical Tests along wih E.coli & Total Coliform

Detail Panel - Rs. 4500/-
Covers Basic & Heavy Metals

Comprehensive Panel - Rs. 16,500/-
Covers All Parameters

Opt for the **Basic panel** if this is a routine check for the potability of your source.
The **Detailed panel** is required if you suspect contamination.
The **Comprehensive panel** gives you a complete picture of the profile of your water purity & impurities.

Physical & Chemical Tests	Heavy Metals	Toxins	Microbiology
Colour	Aluminium	Ammonia	E. Coli
Odour	Barium	Anionic detergents	Total Coliforms
pH	Boron	Free residual chlorine	Yeast & Mould
Taste	Copper	Chloramines	Salmonella
Turbidity	Manganese	Mineral Oil	TPC
TDS	Selenium	Phenolic Compounds	Staphylococcus Aureus
Calcium	Silver	Sulphide	Faecal Streptcocci
Chloride	Zinc	Pesticides	Faecal Coliform
Fluoride	Cadmium	PCB	
Magnesium	Lead	PAH	
Nitrate	Mercury	Trihalomethanes	
Sulphate	Molybdenum	Cyanide	
Alkalinity	Nickel		
Total Hardness	Arsenic		
	Chromium		
	Iron		

Heavy Metal Testing Lab

The heavy metal testing lab at Ecomen is an ultra-modern advanced testing facility equipped with some of the most advanced analytical, testing & research instruments including ICP-MS & AES (Agilent - USA), LC-MSMS, GC-MSMS, QToF (Waters - USA) capable of detecting impurities like heavy metals & pesticide residues at ultra trace levels (ppb/ppt).

Basic Panel - 5 Metals
Rs. 2500/-

Detail Panel - 15 Metals
Rs. 6000/-

Comprehensive Panel - 40 Metals + Minerals
Rs. 15,000/-

Samples for Heavy Metal testing should be collected only in Metal free, plastic containers.

Sample quantity required -

Liquids - 100 ml

Solids - 100 gms

Clinical - Hair - 2 gms, Blood - 5 ml, Urine - 50 ml

Basic	Detailed	Comprehensive
Arsenic	Basic +	Detailed +
Cadmium	Aluminium	Antimony
Chromium	Barium	Tin
Lead	Boron	Uranium
Mercury	Copper	Iron
	Manganese	Beryllium
	Molybdenum	Bismuth
	Nickel	Caesium
	Selenium	Calcium
	Silver	Cobalt
	Zinc	Gold
		Iodine
		Lithium
		Magnesium
		Phosphorus
		Platinum
		Potassium
		Silica
		Sodium
		Strontium
		Sulphur
		Thallium
		Titanium
		Tungsten
		Vanadium
		Zirconium

Food & Drug Testing Lab

The food & drug testing lab at Ecomen is an ultra-modern advanced testing facility equipped with some of the most advanced analytical, testing & research instruments including ICP-MS & AES (Agilent - USA), LC-MSMS, GC-MSMS, QToF (Waters - USA) capable of detecting impurities like heavy metals & pesticide residues at ultra trace levels (ppb/ppt). Besides checking for the presence of adulterants, contaminants, impurities & pathogens.

- Nutrition Panel
- Heavy metals Panel
- Microbiology Panel
- Toxic residue & Contaminants Panel
- Steroids & Synthetic analogue Panel

All samples are tested as per global standards including FSSAI, CODEX, USFDA, WHO, AOAC & Pharmacopoeial methodologies.

Nutrition	Heavy metals	Microbiology	Steroids & Syntheic analogue	Toxic Residues & Contaminants
Fat		E. Coli	Qualitative screening (Present/Absent)	Pesticide residues
Protein		Total Coliforms	Identification test	Aflatoxins
Carbohydrate		Yeast & Mould	Quantitative estimation	Adultaration test
Fiber		Salmonella		EtO residues
Energy		TPC		Additives & Preservatives
Sugar		Staphylococcus Aureus		
Minerals		Pseudomonas		
Vitamins		Shigella		
Cholestrol				
Fatty acid profile				
Proximates				
Amino acids				
Purity & Impurity profile				

Environment Testing Lab

The Environment testing lab at Ecomen is an NABL approved ISO 17025 certified ultra-modern advanced testing facility equipped with some of the most advanced analytical, testing & research instruments including ICP-MS & AES (Agilent - USA), LC-MSMS, GC-MSMS, QToF (Waters - USA) capable of detecting impurities & toxins at ultra trace levels (ppb/ppt).

Stack, Ambient & IAQ

Effluent

Soil/ Sludge/ Compost/ Fertilizers

Ores & Minerals

All samples are tested as per BIS/ CPCB/APHA/ EPA using the latest methodologies & advanced analytical equipments like MP-AES, ICP-OES, ICP-MS.

Ambient Air, Stack & IAQ	Effluent	Soil/Sludge/Compost/Fertilizer	Ores & Minerals
PM 10	Colour & Odour	pH	Iron ore
PM 2.5	Suspended solids	EC	Limestone
Sulphur dioxide	Particulates	Orgaic Matter	Manganese ore
Nitrogen dioxide	pH	Organic Carbon	Dolomite
Ammonia	Temperature	Nitrogen	Bauxite
Ozone	Oil & Grease	Phosphorus	Fluorspar
Carbon monoxide	RFC	Sodium	Gypsum
Lead	Ammoniacal Nitrogen	Potassium	Rock Phosphate
Benzene	TKN	Calcium	
BaP	Free Ammonia	Magnesium	
Arsenic	BOD	Texture	
Nickel	COD	Heavy metals & Minerals	
Particulate matter	Heavy metals	Pesticide residues	
Oxygen	Cyanide	Moistue	
Carbon monoxide	Fluoride	Sodium absorption ratio	
Noise	Phosphate	Cation exchange capasity	
Light	Sulphide	Macro & Micro nutrients	
Organic impurities	Phenolic compounds	NPK	
	Bioassay	Bulk density	
	Nitrate	Pathogens	
	Pesticide residues
